

Learning Differences I: Understanding Learning Differences

We all have different strengths and weaknesses when it comes to learning. Historically, however, schools have approached student learning with a one-size-fits-all mentality and have struggled to incorporate new information from learning sciences.

Learning Differences I: Unpacking Learning Differences is ISTE U's premier online professional learning course designed to expand educators' knowledge of learning differences (such as executive function), help cultivate growth mindsets related to those differences, and show how technology can help support personalized learning.

Through this course, educators will:

- Understand the importance of a problem-solving approach to designing and implementing instruction based on learners' profiles.
- Develop skills, strategies and resources to support the learning differences educators encounter in students.
- Learn to apply a student-centered, data-driven approach for identifying learning differences in all students.
