

Contents

Foreword	ix
Introduction.....	1
Who Is This Book For?.....	3
How To Use This Book.....	4

PART

1 Tools and Strategies

1. Teaching Computer Science in Core Content Areas.....	8
Can I Teach Computer Science Without a CS Background?.....	11
The <i>All</i> in Computer Science for All.....	11
Integrating Computer Science Projects and Activities.....	14
Taking Your First (or Next) Step	23

2. Classroom Strategies.....	24
Become the Lead Learner	25
Communication and Collaboration	28
Authenticity and Ownership	32
3. Selecting the Right Tool for the Job	34
What's in a Tool.....	35
The Tradeoffs in Middle School.....	35
Introduction to App Lab	37
Adapting Projects to Other Languages and Tools	41

PART

2 Coding in Core Content Areas

4. Coding in ELA	44
The Argument for Coding in Language Arts	45
Unplugged Activities	46
5. Coding in Social Studies	61
The Argument for Coding in Social Studies	61
Unplugged Activities	62
6. Coding in Science.....	71
The Argument for Coding in Science.....	72
Unplugged Activities	75
7. Coding in Math	86
The Argument for Coding in Math.....	86
The Vocabulary Problem.....	89

Contents

Functional Programming	89
Unplugged Activities	90

PART

3

Assessment and Feedback

8. Assessing Coding Projects.....	100
Developing a Rubric.....	101
Alternative Mediums for Assessment	104
Supporting Growth and Iteration.....	105
9. Debugging and Persistence	106
Setting Expectations	106
Three Before Me	107
RubberDuck Debugging	107
Debugging Tools	107
Traffic Lights.....	108
When All Else Fails	108
Appendix A: Learning More	115
Appendix B: Getting Set up in App Lab.....	117
Appendix C: Considerations for Other Languages.....	120
Appendix D: ISTE Standards for Students	124
